## **HOW HAVE YOUR GOALS CHANGED FROM THE PLATFORM YOU USED DURING THE ELECTION?**

They've actually increased. The content from the first three goals are pulled from my election platform. The last two goals have been created since taking office.

## **What changes would you like to see under your portfolio in a year from now?**

I'd like to see an increase in accountability and continuity. Something really struck me a couple of weeks ago: when I was speaking to someone from UBC, I mentioned a couple of policy changes I had in mind. Her response was "Wow, something to keep the AMS accountable?"

Regardless of the disrespectful nature of her comment, it is a serious issue when third-parties point out something like this. My goal is to increase the working relationship between the VP Administration and SAC in order to maintain a sense of accountability. Responsible for the administration of the Society, the VP Administration is unique in the executive. There should be an emphasis on continuity and policy rather than individual projects.
