## Report of the *Ad Hoc* Committee of the Fermentation Lab

### September Report

September 27, 2019

Mr. Speaker,

The Fermentation Lab committee instructed Michael Kingsmill to deliver a Marketing Survey Proposal to Sauder School of Business for the students in COMM 468 to complete a marketing survey on the business model of the proposed Fermentation Lab located in the proposed HUB building on the UBC Farm. Unfortunately, COMM 468 could not fit our proposal into their course schedule for this term.

Mr. Kingsmill has contacted additional professors to fit our proposal into their courses for the second term in January and will report further on this initiative.

The land use to build the HUB building is still being negotiated with the Musqueam Band. Thus, no Memorandum of Understanding can be signed with the Faculty of Land and Food Systems until this is done.

Respectfully submitted,

*Kelvin Au*
